

Ventura Bus Lines, Since 1924

Ventura Bus Lines carries over 25 million passengers per year across Melbourne. It has grown from a one man, one vehicle operator to the largest bus operator in Victoria with 500 vehicles and 850 employees.

To stay number one Ventura must continue to innovate in all parts of its business. And they have done so. Using Paywell Plus from Stiearc the payroll department is always in control of this company's busy schedule.

“As Ventura has grown rapidly in recent years our payroll systems needed review. We wanted more flexibility and higher performance. But mostly, we needed to save time preparing our payrun in any way possible.

“Paywell Plus has a proven pedigree and Stiearc is committed to meet our needs. The set of tools I now use has delivered the change I was looking for and gives me confidence going forwards.”

Ivars Prieditis, Payroll Manager

Environmentally Aware

Ventura has a strong focus on environmental awareness. With 3 Ethanol fueled buses in its fleet and Australia's first hybrid electric bus to commence operation in 2008, Ventura is leading the way to a greener future. A proponent of Alternative Fuels, Ventura Bus Lines also registers its charter vehicles with *Greenfleet* to offset their carbon emissions.

Paywell Plus from Stiearc can help further this cause by saving on paper. Payslips can be generated as encrypted electronic documents (PDF) and emailed securely with password protection. Our goal is to make our software more efficient with each release which saves you time but also saves energy by using less resources to get the job done.
